

P-3 Aircraft Location History Report

P-3 Orion Research Group - The Netherlands

EP-3E 159893 was the last of the type to come through Europe. It's seen here at Lajes during a fuel stop on its way back home on 4 November (photo: Collection PORG)

Issue date: November 2024

Changes to the ALHR since the previous report

N925AU	MHD Rockland; stored Keystone Heights	apr24
N927AU	MHD Rockland; stored Keystone Heights	apr24
FAB7205	first P-3AM to be rewinged	13may24
FAB7208	auctioned for scrapping again	jul24

5046	last noted jun18, probably scrapped ?	
5059	2 Kok	jun24
5060	last noted mar19, probably scrapped ?	
5062	last noted jun19, probably scrapped ?	
5063	SOC Hachinohe	jul24
5065	SOC Hachinohe	jul24
5066	SOC Hachinohe	aug24
5073	last noted apr19, probably scrapped ?	
5076	51 Kok	jul24
5080	5 Kok	jun24
5081	203 Kok	feb24
	crash landing at Shimofusa	08may24
5083	2 Kok	jun24
5084	203 Kok	jul24
5096	5 Kok	may24
5097	203 Kok	jun24
5100	2 Kok	jul24

The following abbreviations have been used in this list:

ff	first flight
cr	crashed
rd	re-designated
mod	modified
ntu	not taken up
nwd	nose wheel door
rr	re-registered
pres	preserved
SOC	struck of charge
w/o	written off
AIP	ASuW Improvement Program
ARTR	Acoustic Receiver Tech Refresh
ASA	Administration Support Aircraft
ASuW	Anti Surface Warfare
BMUP	Block Modification Upgrade Program
DFI	Deleted From Inventory
ETD	Executive Transport Department
GOFCO	General Offshore Company
Jax	NAS Jacksonville
Kok	Kokutai
LCC	Lockheed California Co.
LASC	Lockheed Aeronautical Systems Co.
LAC	Lockheed Aeromod Center
Moffett	NAS Moffett Field
NADEP	Naval Aviation Depot
NARF	Naval Air Rework Facility (now NADEP)
NARTU	Naval Air Training Unit
NASC	Naval Air Systems Command
OPS	Operations
OSIP	Operational Safety & Improvement Program
Pax River	NAS Patuxent River
Pt.	Point (as in Point Mugu and Barbers Point)
SRP	Sustained Readiness Program
VAST	Vocaline Air Sea Technologies

AMARG status levels:

FLA	Force Level Assurance (spare parts bird)
FMS	Foreign Military Sales (available for sale)
MUSEUM	exchange object for museums
REC	Reclamation (to be scrapped)
HOLD	war reserve

USN P-3 Squadron-codes

The "P-3 Orion Aircraft Location History Report" gives the codes of US Navy Orion-squadrons. In the past 60 years we can distinguish four major periods:

1962 - end 1986

US Navy Orions were amongst the most colourful aircraft of the Navy. They had large BuNos, squadron codes and colourful squadron markings painted on the tail and large code numbers on the side of the nose

1987 - end 1990

All markings were removed from the Orions. What remained was a small BuNo below the stabilizer or on the inside of one of the nose wheel doors and a small code on the outside of the nose wheel doors.

1991 - 1994

Squadron-codes and markings were painted on the aircraft again: in dark grey on the aircraft that have been re-painted in the Tactical Paint Scheme (TPS) in the meantime (MIL-STD-2161 (AS) dictated the introduction of tactical paint

schemes on 18 April 1985). BuNos are removed from all aircraft with the exception of a small BuNo stencilled on the inside of the refuelling connection hatch.

1994 - current

Starting mid 1994 the codes on the side of the nose are replaced by the last three digits of the BuNo, making it a bit easier to identify an Orion.

Production blocks, Model- & Contract numbers

P-3 Aircraft Location History Report

Production and transfer details of all Orions built are published as follows: Bureau of Aeronautics Number (BuNo - USN serial number), followed by the construction number, delivery date, squadron transfers and remarks. Type designations are printed in bold, squadrons are underlined. Behind a squadron the codes with which the aircraft has flown in that particular squadron are given. Dates are presented in different ways. The first full date is the official delivery date as given by Lockheed Martin (for the last series this info is missing). Full transfer dates are taken from official Lockheed and USN records. Incomplete dates are based on aircraft spotter observations and represent the moment on which a particular Orion was first noted with a squadron. For the Japanese aircraft it has always been difficult to keep track of squadron transfers. The first full date is the official Kawasaki delivery date. Most other dates are incomplete and based on aircraft spotter observations.
